IN THE SPECIFICATION

Please replace paragraph [0044] with the following new paragraph:

The time count is incremented $716 \ 816$, count++, and control returns to the determination 804 of whether Par_T has been reached or exceeded and the subsequent processing dependent on the result of that determination. Responsive to count not being < Par_T, P_{ref} is set to the current iteration w(n), and V_{ref} is set to the current iteration of the y(n).
